ANY QUESTIONS ON THE HOMEWORK?

Northwestern | ENGINEERING

Advanced Data Modeling

- What is the difference between an IS-A and HAS-A relationship?
- Pretend you're the IT administrator for Northwestern University
 - Every degree program HAS students enrolled in them.
 - Every student IS a grad student or undergrad
 - Every student has a studentID, a name, and a phone number
 - Grad students have advisors and dissertations, and undergrads do not
 - What are some ways that you can implement this database?

Evaluating SQL

Northwestern | ENGINEERING

Query #1

Which movies are supplied by "Joe's House of Video" or "Video Warehouse"?

```

SELECT MovieName FROM Movies, MovieSupplier, Suppliers
WHERE Movies.MovieID == MovieSupplier.MovieID
AND MovieSupplier.SupplierID == Supplier.SupplierID AND
(Supplier.SupplierName == 'Joes House of Video'
OR Supplier.SupplierName == 'Video Warehouse');
  
```

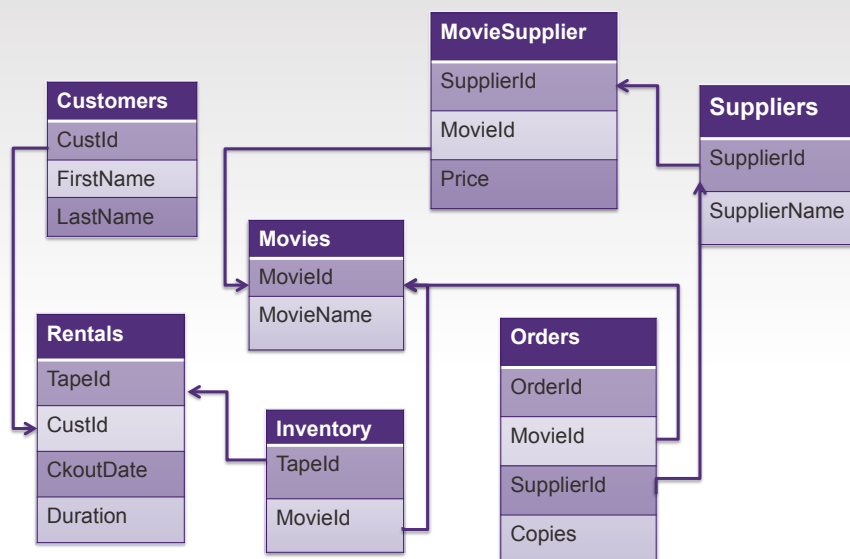

Northwestern | ENGINEERING

Query #2

Which movie was rented for the longest duration (by any customer)?

```
SELECT MovieName FROM Movies, Rentals, Inventory
WHERE Movies.MovieID == Inventory.MovieID
AND Inventory.TapeID == Rentals.TapeID
AND Rentals.Duration == (
    SELECT MAX(Duration) FROM Rentals
)
```

Northwestern | ENGINEERING

Northwestern | ENGINEERING

Query #3

Which customers rented any movies in the Star Wars franchise?

```
SELECT DISTINCT Customers.LastName  
FROM Customers, Rentals, Movies  
WHERE Customers.CustomerId == Rentals.CustomerId  
AND Rentals.MovieId == Movies.MovieId  
AND Movies.MovieName LIKE 'Star Wars%'
```

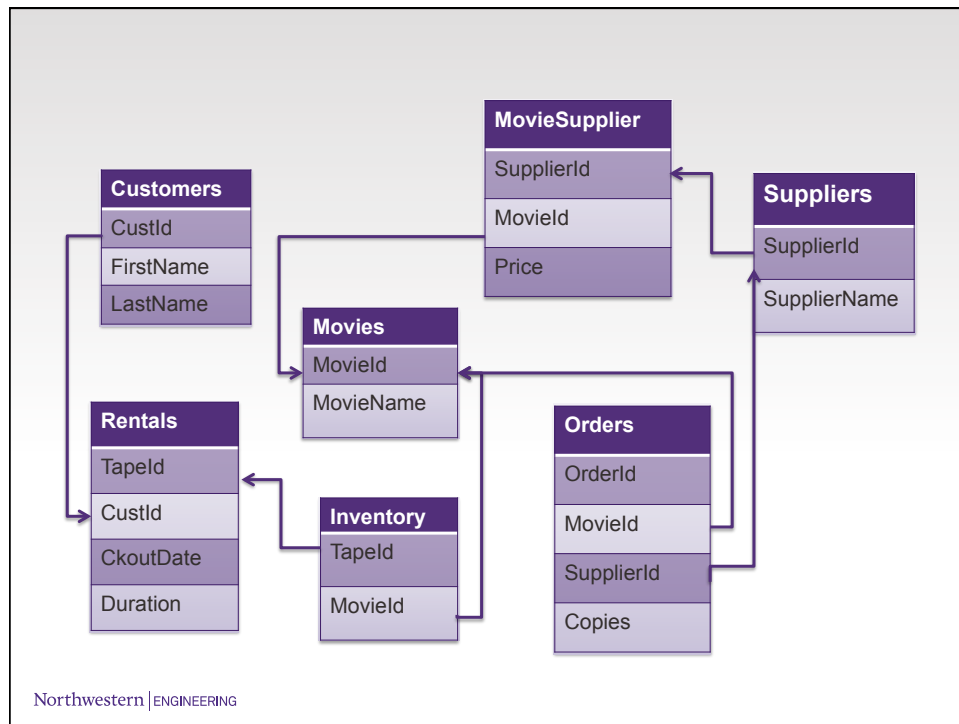

Northwestern | ENGINEERING

Query #4

Which customers rented movies for 5 days or more?

```
SELECT DISTINCT Customers.LastName  
FROM Customers, Rentals  
WHERE Customers.CustomerId == Rentals.CustomerId  
AND Rentals.Duration >= 5
```

Northwestern | ENGINEERING

Query #5

How many movies in the inventory does each supplier supply?

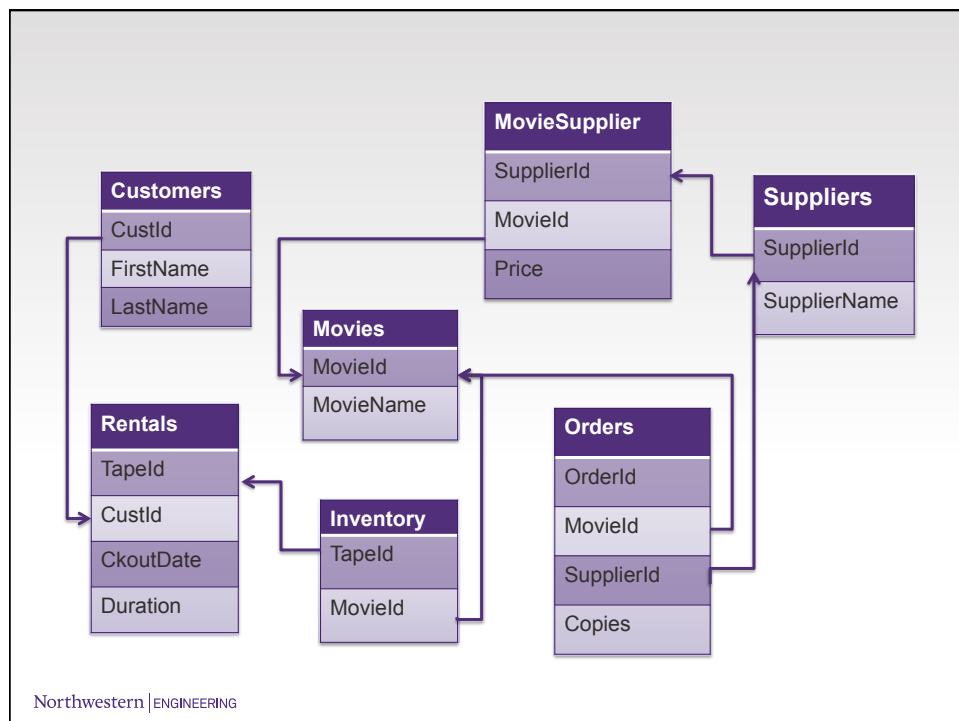

```
SELECT Suppliers.SupplierName, COUNT( DISTINCT MovieID)
FROM Suppliers, MovieSupplier, Inventory
WHERE Suppliers.SupplierID = MovieSupplier.SupplierID
AND MovieSupplier.MovieID = Inventory.MovieID
GROUP BY Suppliers.SupplierName
```

Query #6

Which suppliers supply all the movies in the inventory?

```
SELECT Suppliers.SupplierName
FROM Suppliers, MovieSuppliers
WHERE MovieSuppliers.SupplierId == Supplier.SupplierId
AND COUNT(DISTINCT MovieSuppliers.MovieId) = (
    SELECT COUNT(DISTINCT Inventory.MovieId)
    FROM Inventory
)
GROUP BY MovieSuppliers.SupplierId
```

Northwestern | ENGINEERING

Query #5

How many movies in the inventory does each supplier supply?

```
SELECT Suppliers.SupplierName, COUNT( DISTINCT MovieID)
FROM Suppliers, MovieSupplier, Inventory
WHERE Suppliers.SupplierID = MovieSupplier.SupplierID
AND MovieSupplier.MovieID = Inventory.MovieID
GROUP BY Suppliers.SupplierName
```

Northwestern | ENGINEERING

Query #6

Which suppliers supply all the movies in the inventory?

```
SELECT Suppliers.SupplierName
FROM Suppliers, MovieSuppliers
WHERE MovieSuppliers.SupplierId == Supplier.SupplierId
AND COUNT(DISTINCT MovieSuppliers.MovieId) = (
    SELECT COUNT(DISTINCT Inventory.MovieId)
    FROM Inventory
)
GROUP BY MovieSuppliers.SupplierId
```
